3M TAPE**

The tiles have a slightly napped finish and chamfered longitudinal sides with contrasting colours.

TACTILE GUIDE STRIP ACRYLIC

Matting Tactile Acrylic Guide Strip is installed at specified intervals to guide the visually impaired. The strip consists of acrylic profiles with a slightly napped surface to minimise the slip risk and it is fitted with self-adhesive 3M tape on the reverse side for simple installation. The profiles' longitudinal sides are chamfered and have contrasting colours and are available in four colours: white, black, grey and yellow. The profiles (12) are mounted on a large sheet and are simply cut into individual profiles. When installing, remove the tape's covering paper on the reverse side. The profiles can also be used as contrast markings.

TECHNICAL DATA

	Dimensions (+/- 1 mm)	NCS	Art. no.
Material:	Acrylic Rowmark Textures. 3M 467 tape on the back. Sheet: 610 x 1238 mm. UV-stable.		
Guide strip, acrylic white	48 x 1 200 x 1,8 mm	0,94	362529
Guide strip, acrylic black	48 x 1 200 x 1,8 mm	0,12	362530
Guide strip, acrylic grey	48 x 1 200 x 1,8 mm	0,53	362531
Guide strip, acrylic yellow	48 x 1 200 x 1,8 mm	0,85	362532
Door marking, acrylic black	Ø70 x 1,8 mm	0,12	362533

The guide strip is mounted on a large sheet of 12 profiles.

After exact measurement, carefully remove the covering paper from the reverse side of the strip.
