

BRASS

LINE / SMOOTH

**BRASS
FOR AN
EXCLUSIVE
LOOK**

Brass rivets and elements with the Line surface.

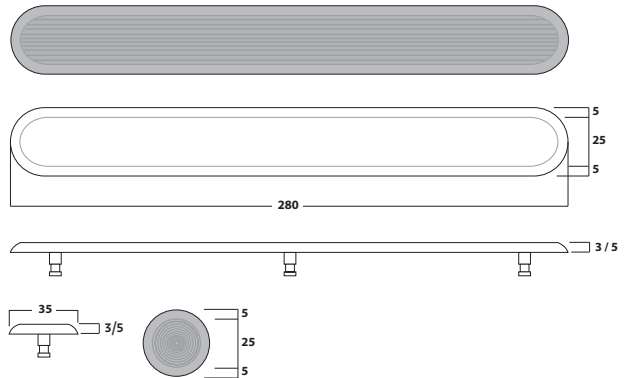

TACTILE GUIDANCE SYSTEM BRASS LINE / SMOOTH.

Milling is used to create the Matting tactile guidance system Brass. Elements are installed with specific spacing to guide the visually impaired. Installation is performed by drilling into the substrate, three holes per element and one hole per rivet. A template is used for hole placement. Fasteners are secured using the recommended adhesive, which is applied in the drilled holes. If you do not want to drill into the substrate, elements and rivets without fasteners are also available for bonding or applying tape. Please contact us if you would like a special version, or if you need any help with installation.

ECO Brass, for a more environmentally friendly, see separate product sheet and BVB ID: 148735

TECHNICAL SPECIFICATIONS

	Dimensions (+/- 1 mm)	LINE	SMOOTH
Material:	Brass	NCS 0,47	NCS 0,51
Element:	280 x 35 x 3 mm		
	Element with fastener	362424	362427
	Element without fastener	362425	362426
	Element with tape	362423	362428
Rivet:	Ø35 x 3 mm	LINE	SMOOTH
	Rivet with fastener	362498	362495
	Rivet without fastener	362497	362494
	Rivet with tape	362499	362496

	Dimensions (+/- 1 mm)	LINE	SMOOTH
Material:	Brass	NCS 0,47	NCS 0,51
