

Matting AB - Environmental Policy for ergonomics, safety, health and environment

Matting AB shall in all businesses act for the environmental awareness, continuous improvement, prevent pollution and in case it is possible, to choose the most environmentally friendly option that has the least impact on the environment. This covers everything from internal consumption to products that we buy, keep in stock and sell to our customers.

- Matting AB shall see to that all employees have a good working environment, high safety and that the workplaces are ergonomically equipped and designed.
- Our operations will be conducted in a resource saving and energy efficient way and we will work to contribute to long term sustainable development.
- We will positively contribute to minimizing the use of packaging materials and we will follow the development of various environmentally friendly packaging materials to use this when possible.
- In our purchasing strategy, we will prioritize those suppliers who in a conscious and strategic way prioritize the production of more environmentally adapted products. It is also a requirement that our providers offer their employees a good working environment and a production where the environmental impact is minimized.
- We will prioritize freight forwarders who in their operations act for reduced environmental impact.
- We shall keep us informed and updated about environmental legislation within our area of business and we shall comply with and apply the requirements and regulations of this legislation.
- Our employees shall continuously receive information and training regarding new and changed regulations in ergonomics, safety, health and environment.
- It is of utmost importance that Matting AB and its employees act and work for Matting AB to always be perceived as a reliable company with good business ethics and a conscious environmental awareness.
