TACTILE GUIDANCE SYSTEMS RUBBER TILES.

Tactile Guidance System from Matting is a tactile and visual product specially designed for indoor and outdoor floors. Its surface is easy to detect due to the high visual contrast with the floor. Due to the rubber material, the tiles are non-slip even in moist conditions, they are wheelchair-friendly and eliminate the tripping hazard. The tiles are glued onto existing floors or surfaces without damaging them. Can be placed on platforms, on stairs, ramps, hallways, elevators, etc.
