TACTILE GUIDANCE SYSTEM PROTECTIVE RUBBER STRIP.

Tactile Guidance System from Matting is a tactile and visual product specially designed for indoor and outdoor floors. The surface is easy to detect due to its high visual contrast with the floor. The rubber material makes the tiles non-slip even in humid conditions, they are wheelchair-friendly and there is no tripping hazard. The strips are glued on top of existing floors and surfaces without damaging the surface. Can be placed on platforms, on stairs, ramps, hallways, elevators, etc.

TECHNICAL DATA

	Dimensions (+/- 1 mm)	Weight	Art. no.
Material:	Rubber. Temperature range: +40°/+10°		
Colour:	RAL 7016 Dark grey		
Protective strip:	2520 x 400 x 6 mm	5.5 kg	362207

Characteristics/advantages

- Clear visual and acoustic contrast to the surrounding floor.
- Sound absorbing.
- Prevent falls.
- Wheelchair-friendly
- Flameproof
- Self-extinguishing
- Very low smoke emission.
- Non-toxic.
- Speedy, simple installation.
- Easy to clean.
- Long service life.
- Eco-friendly.
