

**CHOOSE BETWEEN
SUNKEN
OR
RAISED
MARKINGS**

Black or white raised contrast markings, for indoor and outdoor use.

CONTRAST MARKINGS - SUNKEN OR RAISED.

Contrast markings to alert and guide people with impaired vision in connection with level differences in the surface such as a staircase where the top and bottom steps are marked. The markings are available as a solid line or as circles, they have a slightly raised surface to reduce the risk of skidding. Choose between recessing the markings through countersinking or through placing them on top of the surface. The installation is performed by a specialist.
